

SHORT VERSION OF MONTENEGRO SKIING

INTRODUCTION

The first began to skiing bind to 4,500 years old version of the beginning of the use of skis as transportation means.

However, the cave records in the pictures show that this happened much earlier.

Norwegians are credited with developing skiing as a sporting activity back in 1870.

Before 1890, Montenegrins used so-called payments, and they were used to cross the expanses of Montenegro, for practical reasons.

1890 first Norwegian captain Henrik Angel, aviator with a pair of skis out of the Monte Negro, like "The Devil in the Wires while". At the request of Montenegrin Sven Nikolic, he started training skiing of Montenegrin feathers.

They founded the club Cetinje Ski Association in 1892. and start with a ski school, and the king himself orders the first skis from Vienna. 1895 Henrik Angel publishes a book "Through Montenegro on Skis", describes Montenegrins as very skilled on skis, and at the same time in Nikšić, carpenter Backović makes the first skis in Montenegro.

Further development of skiing is linked between the Second World War and the visit of special units of the occupiers, to which Montenegrins "took over" some equipment to participate in numerous actions and the transfer of mail and medicines during and after the war.

As a thank you to Captain Angel, an Angel Cup was established.

In 1893, the first club was established in Montenegro in Cetinje by some sources and the first in the SFRY.

It took 4 decades for Montenegrins to start organizing skiing on the slopes of Bjelasica.

1933 is the year when the ski society was organized in Kolasin.

Slovenian serving military service, organized a lecture on skiing.

There are reports that a group of Swiss tourists passed through Bjelasica in 1905.

Ski competitions are organized "at Orjen, Crkvice where 45 skiers are registered, Lovćen is also a venue for young skiers competitions.

After World War II in 1949. On March 22 and 23, Kolašin hosts the first Republican competition in Montenegro. In the same year, the Ski Association of Montenegro was founded and clubs from Zabljak, Niksic, Rozaj, Savnik, Bijelo Polje, Titograd, Plav, Kotor and Herceg Novi are members of the newly formed Ski Association.

In the 60s, the famous Janez Rolda trained jumpers on Zabljak.

In 1962, the Nordics from the YU area are in Zabljak, in the same year a 60 meter long jump is being built. In 1965, a championship was held in Zabljak, in 11 disciplines. The Slovenes took all the first places.

In the 1970s, Nikšić gathered over 150 competitors.

During the 70's and 80's, skiing woke up, equipment was purchased, leading Kolašinci and Žabljak residents.

Skiing yesterday, today and tomorrow

There are 16 clubs active, as much interest and financial support as possible.

For the last 5 years since the slalom and giant slalom courses have been approved , the FIS competitions, the Cup of Small Nations with over 70 competitors from 19 countries in the Alpine and Nordic disciplines, have been held regularly.

All senior competitions in Montenegro are of international character.

There are different grades of performance of non-Montenegrin skiers, but we have to agree that without good winter centers there are no good skiers.

The famous wingman who is the best teacher?

Of course, the lift, the cable car.

The first cable car from Kotor to Lovcen, although freight and built 1916.god. d uga 2607 meters with a vertical drop of 963 me today is the longest and tallest, unfortunately does not work. He's competing for some new time.

With the formation of winter centers in Montenegro, the first elevators of the 70s began to be built on Zabljak, Kolašin, Vučje, Kosanica, Smiljevci, Bjelasica, Ivanova korita.

The Ski Association is separating itself from the mountaineering association and is gently taking over the organization in technical and technological terms for Montenegro.

The Ministry of Sport with the Olympic Committee supports all the activities of the clubs and the Alliance.

New Winter Centers are being built, cable cars are being developed, the media is more closely following the events in the mountains.

Organized ski schools in cities do not give the desired results to get quality from the masses.

The education of ski judges, lifts, lifeguards, ski instructors, and specialized crews is a prerequisite for improving skiing and white sports in special conditions .

Yet, in the last decade or two since the emergence of statehood, we have achieved quite solid results.

To view the Olympic and world participation of our alpine and Nordic competitors:

Alpine:

2007 - Championships Are W Sweden - Bojan Kosic

2009 - SP - Valdi Zer F rancuska, Bojan Kosic

EYOF - Mladen Minic, Jaksa Kosic

2010 - Winter Olympic Games Vancouver, Canada - Bojan K axis ht

2011 - SP Garmis partkenkirhen - Bojan Kosic and Mladen Minic

EYOF - Ivana Bulatovic, Milena Radojicic, Tarik Hadzic, Elzana Kurtagic

2012 - YOG Junior Olympics for Youth Innsbruck - Milena Radojicic

2013 - SP Sladming Austria - Bojan Kosic, Milena Radojicic, Ivana Bulatovic,

Mladen Minic, Tarik Hadzic

EYOF Poland - Milena Radojicic

2014 - ZOI - Ta rik Hadzic, Ivana Bulatovic

2015 - SP Veil America - Bojan Kosic, Ivana Bulatovic, Tarik Hadzic

EYIF Linktestajn - Nadezhda Milosevic

2016 - YOG Lillehammer Norway - Nadezhda Milosevic, Eldar Salihovic

2017 - SP sentmoris swiss - Bojan Kosic, Nadja Milosevic, Ivana Bulatovic

EYOF Turkish Erzurum - Eldar Salihovic, Bojana Milosevic

2018 - Winter Olympic Games - Jelena Vujicic, Eldar Salihovic Alpine, Marija Bulatovic Nordic

2019 - SP Are Sweden - Bojan Kosic, Eldar Salihovic

EYOF BIH Sarajevo - Jelena Vujicic, Aleksandra Vujisic

Nordic:

2015 - SP Falun Sweden - Marija Bulatovic, Jelena Bulatovic, Radovan Radovic,
Nikola Anđelić

2017 - SP Lasti Finland - Bulatovic Marija, Radulovic Miljan, Bulatovic Mirko,
Grbović Veljko

2018 - Pyong Yang Olympics, South Korea - Maria Bulatovic

In 2000, the SSCG formed the Sub-Committee for the Approval of Trails of Montenegro.

Demanding and extensive technical and technological jobs are based on strict regulations that must be implemented in order to obtain a valid FIS certification for individual disciplines, Alpine for men and women, snowboarding and Nordic disciplines.

All this with the development of cross-profit land had to be accompanied, vertically and horizontally with drainage mats for drainage of atmospheric water, with geological tectonics is not simple because it is a huge surface to be adequately done, maintain and protect the of nature itself. That is sometimes possible sometimes not.

Bjelasica rounds off the field of men's and women's slalom homologation trails .

Bjelasica is in the final phase of approval of the Blessed Dollar for Nordic disciplines . If this is added to the new average trails that will be processed in the future, then Bjelasica Ski Resort will get the right story and be able to organize competitions at the highest level, which is the goal of every Ski Center. Now the Center has 5 approved paths.

Skiing like an atomic bomb, it has expanded and expanded its range of activities to this day. From modest adventurers and enthusiasts, who made their first skis from primitive materials, without elevators, cable cars, gondolas, helicopters, mastered even the highest mountain ranges and descended its slopes, that additional skill in the snow was crowned and with his own departure for the Olympic Games .

Today it is a modern and one of the largest industries in the world.

With us we can say freely we are just beginning to fantasize that we too will begin to participate more seriously in the sharing of cakes, and therefore we are looking for a chance to work, make money and enjoy the most beautiful invitation on the planet.

Will we be able to do that?
